

REVERSE PORTABLE LAMP
TRAVERTINE, SAND/ALU., BRONZED - EU / US / UK / CN
Designed by *Aleksandar Lazic*

In his search for simple and clever solutions in any given space, Danish designer Aleksandar Lazic looked to Italian marble tables from the 1970s when creating the Reverse Lamp. Inspired by the play on structure created by geometric constraints, the conical travertine base and curved, bronzed aluminium shade define the lamp's perfectly balanced expression. The light diffuses evenly across the unworked stone, left raw to allow the light to highlight its natural imperfections, revealing shadows and an intriguing colour play that seems to stem from the base itself. At precisely the point at which the shade and base meet sits a dimmer switch for adjusting the light intensity. Fitted with a dim-to-warm LED light source, the Reverse Lamp casts warm light on a bedside table or subdued light on a cabinet surface, making it an elegant and characterful solution to a multitude of lighting needs. The Reverse Table Lamp is sold included five interchangeable plugs suitable for North America, China, Europe and the UK.
