

CUOIO. Design: E.O.S.

The logic of minimalism determines the shape and materials of the Cuoio Chair and Lounge Chair. Leather and steel are the components of surface and framework. The fact that the model is separable and recyclable ensures it is a high degree of sustainability. The Cuoio Chair comes both with and without armrests. The footstool and the comfort cushion for your back complement the delicate Lounge Chair.

Product description

Design awards
