

EDISON *the* PETIT

the STORY

EDISON THE PETIT

New Edison the Petit is doing it big!

The new Edison the Petit boasts a few next generation crazy awesome specifications that (literally and figuratively) make her shine from head to toe.

Just like her big brother, Edison the Petit got her name from the inventor of the light bulb (1879): Thomas Edison. But her tiny appearance is far from old and dusty, because her new inner works with LED technology probably would make the real Edison feel proud. Unlike her old self, she now glows all the way from tip to toe. All elegant contours of her small physique are beautifully accentuated like a hot supermodel wearing lingerie. Sometimes changes on the inside can make a lot of difference on the outside.

the FEATURES

- *You can bring me everywhere you want*
- *I come with LED technology!*
- *I come with 3 different shades of light*
- *I glow for 6 hours when you've put me on highest light power*
